

RIPPLE-1 STUDY IS **NOW ENROLLING!**

NATIONALLY ACROSS AUSTRALIA
AND NEW ZEALAND

Do you have Diabetic Macular Oedema or Retinal Vein Occlusion?

You may be eligible for a
treatment research study

Study Criteria:

- Age \geq 45 years
- Diagnosed with DMO or RVO
- Not eligible if you are currently taking steroid therapy

If you qualify for the study, you
will receive the following at no cost:

- Study treatment
- Study-related care from your study doctor
- \$250 for each study visit to cover costs such as travel and meals

Study Treatment: A small implant (one or two) containing slow release steroid medication will be placed in your eye. The goal of the treatment is to decrease retina swelling (oedema) and improve vision.

HOW CAN I GET STARTED?

1

Contact our Study Coordinator

To learn more about the study and see if you are eligible. Our study team is available to talk to you.

2

Determine Eligibility and give Informed Consent

The study team will explain the study procedures and the potential benefits and risks.

3

Participate

If eligible, the study lasts 18 months. After getting the study treatment, you will visit the site 7 days later and then on a monthly basis.
